

# Study Skills

Supporting both academic and non-academic students, we take an individualised approach to student learning to identify study habits that will accommodate students learning styles and support their existing strengths.

Working through practical case and storytelling of success through improved study technique we work with students to understand challenges to their work pattern and offer practical solutions to support their personal routines and activities around study and learning.

*Turning Point  
Consulting*

At the completion of the workshop attendees will have assessed the benefits of enhancing study habits both in and out of the classroom to improve academic outcomes as well as helping establish a better work/life balance. Students will be actively involved in group discussion, assessing their own person learning style and reflecting on how to better manage time and modify the learning environment to create lasting study habits for success.

## Junior Study Skills Overview

- Importance of motivation in learning
- Purpose and block of homework completion
- Prioritizing schedules through effective timetabling
- Managing the learning environment
- Establishing effective support systems

## Senior Leadership Overview

- Identifying study habits aligned to individual learning styles
- Time management through prioritization and effective timetabling
- Identifying study road blocks
- Reflecting on modifying the learning environment

*"The Brisbane Water Secondary College Careers Team found the day highly valuable for our students who got a lot out of it and as professional development for ourselves as well. At the end of the day, students provided feedback sharing that they thought the activities were fun, interesting, they understood the content, learnt something new and understand themselves better. All the students felt comfortable with the speakers, thought they were friendly and were interested by them."*

**Yvette Beemster, Career Advisor  
Brisbane Water Secondary College**
